

PLAY ELEMENTS

# COMPLETE YOUR PLAY SPACE

'The Mill' in Petrie, QLD. Our freestanding elements work alongside any system – including custom playgrounds like this one designed by Third Place Design (part of the PARX Group). Featured Products: Spinner & Mega Swing.

# GREAT PLAYGROUNDS NEED MORE THAN SOMETHING COOL TO CLIMB...

**Everyone loves a hero piece. But great play spaces offer variety, developmental range and room for everyone to play.**

The best playground designers see the whole picture. They think about children waiting, toddlers exploring, kids building confidence before tackling bigger challenges. They design with intention, placing elements that encourage movement between zones, creating opportunities for sensory exploration and ensuring every child finds something that meets them where they're at.

We've curated some of our most popular freestanding elements to complete your playground – from spinners and springers to runways and swings.

Selected to complement a range of aesthetics, including our iconic Rustik adventure play systems, these elements are the perfect addition to any play environment. Not only can they help fill space around larger systems to create a cohesive play environment, but they also provide rich play experiences in their own right.

*Board Rider at Birtinya, QLD. Stainless steel framing and fixtures ensure our play elements are fit for all conditions, including coastal environments and high-frequency use.*

## INCLUSIVE ORBIT 2.0

POPULAR

PRODUCT CODE: PD-INC2

Spinning builds vestibular development and spatial awareness as children explore cause-and-effect through movement. This highly engineered rotating platform delivers the fun of traditional roundabouts with modern accessibility. Flush-mounted to allow wheelchair access, the Inclusive Orbit is designed to engage all ages and abilities.

## SPINNER

POPULAR

PRODUCT CODE: PD-SPIN

Shift, spin, learn. The spinner lets children explore cause and effect through movement, shifting their weight to control speed and discovering how momentum builds force. Great for building vestibular processing, balance and social coordination.

# SWINGS

## MEGA SWING

PRODUCT CODE: PD-MEGA

The Mega Swing brings social play and kinetic thrill to any space. Designed for multiple users at once, sitting, standing or swinging together, it's a magnet for older children and teens who've outgrown traditional swings but still crave movement and challenge.

↑ FHOFF 1.95m   
 ↓ MAX HEIGHT 3.6m   
 SITE REQUIRED 9.2 x 9.2m

## SINGLE BAY SWING

PRODUCT CODE: PX-SBSW

Flexible swing configuration for diverse play. This single bay system supports one or two seats ensuring children of all ages and abilities can participate. Swinging provides critical vestibular and proprioceptive input, building balance, coordination, spatial awareness and gross motor skills through joyful, inclusive movement.

↑ FHOFF 1.6m   
 ↓ MAX HEIGHT 2.9m   
 SITE REQUIRED 4.3 x 8.2m

## TWO BAY SWING

PRODUCT CODE: PX-TBSW

Same flexibility, double the capacity. This two bay frame accommodates up to four swings depending on configuration. Mix and match toddler seats, flat seats, inclusive seats, friendship swings or team swings to serve your community's needs.

↑ FHOFF 1.6m   
 ↓ MAX HEIGHT 2.9m
